WEATHER OF CONCERN

Northern California

- Winter Storm Watch from late Monday morning through Tuesday afternoon above 5,000 feet for the northern Sierra Nevada, including I-80 and Hwy 50.

California Coastal Areas

- Some of the highest tides of the year (large tidal fluctuations - King Tides) are forecast to bring minor coastal flooding this weekend through early next week.

Weather Advisories, Watches, and Warnings currently active in California:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca>

Active Weather Warnings, Watches and Advisories by County:

- <http://www.wrh.noaa.gov/hazardSummary/?state=ca&bycounty=1>

WEATHER SYNOPSIS BY REGION

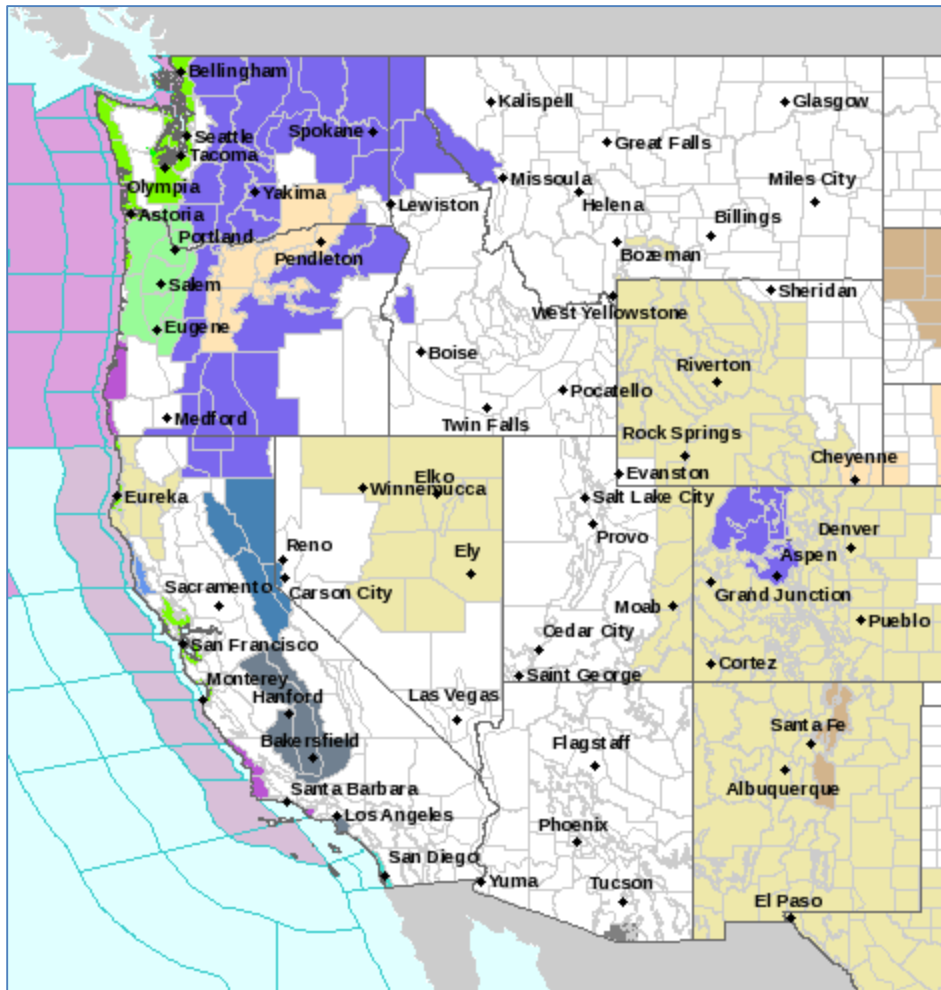

NORTHERN CALIFORNIA

- Unsettled weather, due to a series of Pacific troughs, will continue through at least the middle of next week.
- Possible pattern shift to drier-warmer regime with occasional northerly wind events starting late next week although confidence only moderate at this time.
- Another round of wetting precipitation is initially starting tonight and continuing through at least the middle of next week. Northern areas appear to be favored the most but weather models have jumped around a bit on projected precipitation totals.
- Snow levels will start out on the higher side, generally above 5000 feet, but should lower and drop as low as 3000-4000 feet early next week, especially favoring far northern and eastern areas.
- Periods of gustier wind flows starting Sunday and lasting through next week. Some drier, northerly flows possible next week, especially late week.

SOUTHERN CALIFORNIA

- A pair of weak troughs will bring cool, breezy weather to the region over the next few days. Another chance of precipitation will occur Monday afternoon into Tuesday morning. Significant snow accumulations may occur from this second system from Tuolumne County northward. Light offshore flow may develop next Wednesday night, but temperatures are expected to remain quite cool next week.
- Cooler over the next few days with highs ranging from the 40s in the mountains to the mid 60s across the valleys of Southern California.
- Northwest winds of 15-25 mph with gusts to 45 mph this afternoon from the Kern County Mountains across the Mojave Desert.
- North winds of 20-30 mph possible Tuesday through the I-5 Corridor. Scattered showers will develop Monday afternoon before spreading southward into Southern California late Monday night into Tuesday morning.
- Over a foot of snow will be possible above 4,000 feet in the Sierras from Tuolumne County northward. The rest of the area will see 0.25" – 0.33" of precipitation.
- Gusty northwest winds of 20-30 mph likely in the desert Tuesday afternoon. Winds weakening and shifting offshore Wednesday night. At this time, the offshore winds are expected to remain light.
